

Craft Templating Reference

GLOBAL VARIABLES	craft	now	siteName	siteUrl	user	global set
------------------	-------	-----	----------	---------	------	------------

craft.assets
craft.user
craft.request
craft.feeds
craft.entries

now.year
now.month
now.day
now|date("M d, Y")
now|date_modify("+1 day")

craft.entries	craft.assets	craft.user	craft.request	craft.feeds	craft.tags
 get your entries: retrieve all, some or just the count:	Total entries: {{ craft.entries.total() }} {% for entry in craft.entries.find() %}...{% endfor %}				
craft.entries.find() .first() .total() .ids()	craft.assets.find() .first() .total() .ids()	craft.user.find() .first() .total() .ids()		craft.feeds.getFeedItems()	craft.tags.find() .first() .total() .ids()
 the following filters help you retrieve only what you need	Refine your query by chaining the filters: {{ craft.entries.section('not cocktails').authorId('10').total() }} {% for entry in craft.entries.limit('4').before(now date_modify('-7 days')).total() %}...{% endfor %}				
craft.entries.after(date).find() .archived(bool) .authorGroup(name) .authorGroupId(n) .before(date) .childOf(name) .id(n) .language(name) .offset(n) .parentOf(name) .search(name) .section(name) .sectionId(n) .slug(name) .status(name) .uri(name) <i>exclusive to .find():</i> .limit(n) .order(name) .indexBy(name)	craft.assets.kind(name).first() .dateCreated(date) .dateUpdated(date) .filename(name) .folderId(n) .height(n) .kind(name) .size(n) .sourceId(n) .url(name) .width(n)	craft.user.email(name).total() .firstName(name) .lastName(name) .friendlyName(name) .preferredLocale(name) .admin(bool) .status(n) .lastLoginDate(date) .dateCreated(date) .dateUpdated(date)			craft.tags.parentOf(name) .childOf(name) .childField(name) .id(n) .name(name) .offset(n) .parentField(name) .parentOf(name) .search(name) .set(name) .setId(n) <i>exclusive to .find():</i> .limit(n) .order(name) .indexBy(name)
 once in an entry, test against or output its data	{% for smoothcocktail in entry.section('cocktails').tags('not sour','not bitter').find() %} {% if entry.getParents('ingredients').total() < 4 %} {{ entry.title }} is a basic, smooth drink {% endif %} {% endfor %}				
entry.author .authorId .cpEditUrl .dateCreated .dateUpdated .enabled .expiryDate .getChildren(fields) .getParents(fields) .id .language .postDate .section .sectionId .slug .status .tags .title .uri .url	asset.dateUpdated .filename .folderId .getChildren(fields) .getParents(fields) .getHeight(fields) .getWidth(fields) .getUrl(fields) .height .id .kind .size .sourceId .url .width	user.dateUpdated .admin .dateCreated .email .firstName .friendlyName .getChildren(fields) .getParents(fields) .id .lastLoginDate .lastName .preferredLocale .status .username	craft.request .firstSegment .getParam(name) .getPost(name) .getQuery(name) .getSegment(n) .isAjax .isLivePreview .isSecure .lastSegment .path .segments .serverName .url
